## Summary

Java backend developer (B.Tech CSE, 2026) who builds **RESTful APIs** with **Spring Boot** and **PostgreSQL**, with a focus on data integrity, clean layered design, and testable code. Built a containerized expense-tracking backend with validation, centralized error handling, and database-driven analytics. Strong in Object-Oriented Design and Data Structures & Algorithms; looking for a backend role on a fast-paced product team.

## Technical Skills

**Languages**: Java, SQL, C++
**Backend**: Spring Boot, Spring Data JPA, RESTful API Design, Bean Validation
**Databases**: PostgreSQL (JPQL, aggregation queries)
**Core CS**: Data Structures & Algorithms, Object-Oriented Design, Low-Level Design fundamentals
**Tools**: Git, GitHub, Docker, Docker Compose, Postman, Maven

## Projects

**ZenFlow – Expense Tracker & UPI/SMS Parsing Backend** | *Java, Spring Boot, Spring Data JPA, PostgreSQL, Docker GitHub*

- Designed and built RESTful APIs for expense management using a layered architecture (controller, service, repository), with Spring Data JPA and PostgreSQL for persistence.
- Enforced data integrity with Jakarta Bean Validation and centralized RFC 7807 Problem Details error handling, giving clients consistent, structured error responses.
- Wrote a deterministic UPI/SMS transaction parser using regular expressions and rule-based extraction, so the same input always produces the same output.
- Implemented custom JPQL aggregation queries for category-wise and weekly spending analytics, keeping calculations in the database rather than application code.
- Wrote automated tests across controller, service, repository, validation, parsing, and analytics layers; containerized the app and database with Docker Compose for repeatable setup.

## Problem Solving

**LeetCode – Data Structures and Algorithms** **Jan 2026 – Present**
*Online Platform*

- Solved **100+ problems in C++** across **Arrays & Hashing**, **Two Pointers**, **Stack**, **Sliding Window**, **Binary Search**, and **Linked Lists**, focusing on time and space complexity trade-offs.

## Education

**Bennett University** **Greater Noida, India**
*Bachelor of Technology in Computer Science and Engineering; CGPA:* ***7.75/10.0*** *August 2022 – June 2026*
